

How to access Hosted Desktop from the iPhone / iPad.

To access the Hosted Desktop service from your iPhone / iPad you will need to complete a one time setup procedure, step-by-step instructions for which are provided below.

1. Download and install the '**Citrix Receiver**' application onto your iPhone / iPad from the **Apple 'App Store'**. *You will be required to enter a valid Apple iTunes account to complete this step.*

2. Open the Citrix Receiver application by selecting the Citrix icon.

3. Next click on the '+' symbol on the Accounts menu.

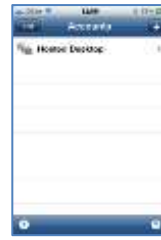

4. Next add the details in the 'General Settings' Menu.

Description: Hosted Desktop
Address: <https://login.letsoperate.com/hd/m/config.xml>
Username: Your full email address
Password: Leave blank
Domain: nasstar-t1
Access Gateway: Off

5. Now click on 'Save' to close the 'Add Account' screen.

6. Now click on the 'Hosted Desktop' option in the 'Accounts' screen.

7. If a warning message opens, advising you that 'Administrator has disabled saving passwords on this server' simply click the 'Dismiss' button.

8. When prompted to enter your password, do so.

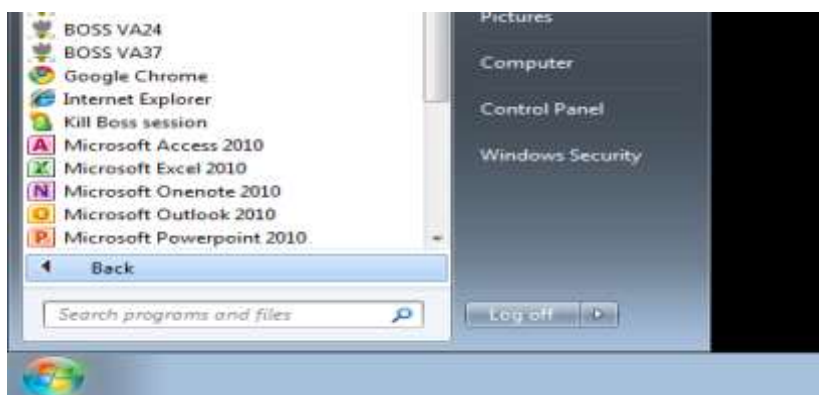

9. Next, click on the 'Lets Operate Desktop 7' option to launch Hosted Desktop

10. A loading screen will then appear advising you to 'Please Wait', which may take up to 30 seconds to close.

11. Finally, you will be presented with your normal Hosted Desktop screen.

12. When you wish to close Hosted Desktop, simply log off in the usual way.
